  - Lite WF Options (8.8m)
  - 400MMC Option (11.5m only)
- Credits
- Requirement Links
- Redistribution
- Social Links

## **INTRODUCTION**

First off, thank you very much for downloading the Eastern Transport Holdings Pack, which features the liveries that are carried by Independent Operators Stephenson's of Essex and NIBSBuses

As the name suggests, the group known as Eastern Transport Holdings is led by parent company Stephenson's of Essex, owned by Bill Hiron. The operations are primarily within South and Central Essex, with other operators also in Suffolk and Cambridgeshire, with smaller operator NIBSBuses being taken over from its previous independent owner and now being part of Stephenson's and Eastern Transport Holdings

## **Vehicle Requirements**

To have the full experience with this Repaint Pack, you will need the following requirements:

- Lancsbus Omnidecker
- V3D Enviro 200 MMC + MrChips Enhancement Pack
- Chloee 10.8m Enviro 200 MMC
- Studio Polygon 400MMC
- Studio Polygon Lite WF

Please note: Repaints carried on the Optare Solo (Digibus Mirage) will come to this pack in a later update

The links to these vehicles will be included in the Eastern Transport Holdings Download Page on Semaphore Simulations and on the final page of this readme

## **DOWNLOAD INSTRUCTIONS**

For the repaint to be fully optimized and working, you will need to follow these instructions on how to install the Repaint Pack.

Any small error will cause the Repaints to not work and will become defunct.

1. Open up the .zip file in Windows Explorer/My Computer. Holding the left mouse button, drag a box around ALL of the folders in the download so they are highlighted then select "Copy" from the pop-up menu
2. Open up a New Window and navigate your OMSI 2 directory. Right click and then select "Paste" from the pop-up menu. Be careful to not paste it in the wrong folders, here's the directories below:  
C:\Program Files (x86)\Steam\steamapps\common  
C:\Program Files\Steam\steamapps\common
3. You will likely get another pop-up, asking permission to merge or overwrite the existing folders. You must click "Yes to All", "Yes, do this to all current items" or similar. If you have not been asked this, then you have pasted in the wrong directory. Re-do steps 1 and 2 for this

## **Livery Selection**

Now we move on to the Livery Selection. When you have officially installed the Repaint successfully after you've followed the 3 steps in the previous page, you will be able to drive the vast variety of liveries that are included in this Pack. Below is the directory of where the repaints will be when opening up the OMSI 2 Vehicle Selection Menu:

- **Omnidecker Options (10.6m)**

\*\* It's recommended to use the Kreuger Displays as the MS Displays Option will not work

## **CREDITS**

Without these people, this repaint pack would not have been possible. I thank these people for make this Repaint Pack as possible as it can be:

- EssexEclipse2 - Pack Contributor
- JKMDodger - Testing the many liveries for this pack

## **REQUIREMENT LINKS**

This page features the links for the required vehicles for this repaint pack to fully function properly. It's best to have all requirements for the best experience.

## **REDISTRIBUTION**

Lastly, we move on to the repaint distribution. As it suggests, this Repaint Pack is meant to be uploaded on Semaphore Simulations and must NOT be uploaded anywhere else without prior permission from EssexEclipse2

Textures used in this Repaint Pack must also **not** be used without prior permission from EssexEclipse2

If you do wish to use the Textures that are in this Repaint Pack, please message me via Fellowsfilm (EssexEclipse2). Explain in full detail what bit of texture you would like to use and make sure you give full credit to me if by chance you use a piece of Texture from this Pack

As with the re-uploading, this Repaint Pack will **only** be uploaded onto Semaphore Simulations **only** and should **not** be uploaded onto any other 3rd-party Websites without my permission. Please message me if you see anyone doing this, but I will make sure they have permission first before doing the sanctions
